

# The Project for Expanding Sachal Educational Academy in Shora Village, Jamshoro District, Sindh

The floods in 2022 forced many people in District Jamshoro to relocate to safer areas, disrupting the education of school-going children who missed classes after relocating. In 2023, the Participatory Research and Development Organization (PRADO) received 320 applications, mainly from relocated families, but lacked sufficient space to accommodate all students on the waiting list.

It is fun to study at such a beautiful school!

Under the GGP scheme, PRADO constructed a school building with 10 classrooms. As of March 2026, 387 students are receiving an education in the newly constructed school.

Almost **390** students are enrolled at the new school.
