

The Project for Provision of Vehicles for Mobile Medical Treatment and Transport for the Karwan-e-Hayat Mental Illness Hospital in Karachi

Vehicles with a Japanese flag are seen in the city!

Karwan-e-Hayat Institute for Mental Health Care provides medical services, rehabilitation services, and vocational training to patients with mental illnesses free of cost. After realizing that the condition of patients improved after continuous treatment and rehabilitation, the organization has started transportation and home care services. However, the vehicles they had were not sufficient to serve all patients.

Under the GGP scheme, the institute has received seven vehicles to provide the transportation and home care services for more than 1,000 patients.

Point

More than **1,000** patients were provided transport and received home care services from Jul. 2023 till Nov. 2023.
