

Qasim Mehmood

Step-3

I share my experience with you,

I was a part of a short term invitation program to Japan offered by JICC which commenced on 18 May, 2013 up to 25 May, 2013.

In Japan we visit many places such as Meet with Mayor of Minamiaizu Town, Anaraki elementary school, Auditorium, Taiko drum practice,

Now, from the Japanese School system I learned one thing that is very important all the schooling system of Japan is same either is in City or in village, all the children is so enthusiastic and they welcomed us .

I attend Calligraphy and Origami classes with them and I learn from them these arts which I have never done before in my entire life.

I observed that the Japanese nations is very sincere with his works we were in City hall Mayor Mr Ohya welcomed us and all the employees performed their duties . They doesn't left their works on others

In Sumita factory, there is no security system no boundaries all over the factory anyone can move here and there easily no robbery no disturbance . I observed that lights travels from one point to other end such as I want to spread the knowledge of peace and prosperity from Japan to Pakistan and also in other countries, there is no radiation problems in Fukushima

The Taiko Drum practice is most enjoyable moment of Trip, where we sung our National song " Jeevay Jeevay Pakistan " and also practiced Taiko drum with Mr Ken

Some points for JAPANESE nation

They are honest, sincere, trust worthy and well disciplined

They know the value of time

They are punctual

They are hard worker, courteous respect

Unique lifestyle modern but preserved their culture

The technology and communication is excellent

I thanks to JICC for this wonderful opportunity I also offer my thanks to the Counsel general of Japan and the rest of the members of the consulate and PJCA to select us and provide us the guidance to for this tour.

Free Universal and Flexible

Not letting dreams as only dream for the future

Thank you !
